! Also available for other types of collectors. Contact us!

## ACCESSORIES FOR COLLECTORS

Solid bottom plates are available for all types of collectors, as well as uni-versal collector models WU175, WU275, WU375 and WU475. The plates have a light gray finish and are made of anti static ABS.

Bottom plate, ABS

The plates are removable and thus easy to be cleaned. (see 61-63)

Stainless steel bottom plate

Designed for special hygienic applications. E.g. Operation Rooms and Critical Care Units.

Fits to below mentioned collectors:

COLLECTOR	ORDER CODE
165 Series	<b>BP 165</b>
195 Series	<b>BP 195</b>
265 Series	<b>BP 265</b>
295 Series	<b>BP 295</b>

Holder for disinfection dispenser HM 1, 2 with optional drip bin on W165, W265, W365, W465

MODEL	ORDER CODE
Holder for HM 1, 2	<b>HM-G1</b>

Lid damping mechanism

The lid damping mechanism can be integrated in the foot pedal mechanism. Due to the damping mechanism the hinged Hammerlit lid DT 8 closes slowly and silently.

Retrofitting is only possible for Hammerlit collectors produced and starting from the year 2000.

Foot pedal mechanism **LT**, Donut bumper **SP32**

This quiet pedal mechanism has undertaken millions of rigorous test cycles. Passing these tests without the slightest abrasion.

SP31 = 65er Series  
SP32 = 95er Series

The lid is opened by simply pressing the foot pedal. Every pedal is equipped with a rubber stopper to prevent the collector from sliding away, noise, and damage.

Docking Bracket

Hammerlit collectors can be fitted with a docking bracket to suit the linking mechanism of our linen carts. (Linkable Ward Carts see page 68).

„Linen ward carts Series EWPU 40 and EWPU 41 can be customized to meet your individual needs.“

- ! Linen ward carts are also available in **Topline** execution, made of High Pressure Laminate (HPL) coated plate with 2 mm ABS edge strip. Topline offers significantly **lower weight**.

### // INFORMATION

As an option doors and drawers can be fitted with locks.

- ! Other color combinations (available at extra charge) see page 15-16.

General description and technical information for Series EWPU 40 and EWPU 41 (see page 69). Linen Ward Carts of Series EWPU 40 and EWPU 41 are available with attached grip rings (see page 69) or with Linkable Ward Carts (see page 68) and Linkable Linen Hampers (see page 74).

\*Accessories for Ward Carts you will find on page 73.

## LINKABLE WARD CARTS

Linens ward carts and laundry collectors are available in versions able to be coupled together. Coupling is effected by using a foot-pedal, accessible from either side and without lifting the units. (design patent DGM 20 2006 018369.8) These units can of course also be used on their own, and to preserve hygiene they can be stored separately in the clean and unclean areas.

Linens ward carts without clamping rings (models EWPU 400, EWPU 410, EWPU 410AG and EWPU 380) can be fitted with EWPUK 18 coupling equipment. This stainless steel device is fitted to the bottom at the rear of the cart and consists of a robust foot pedal and a hook mechanism.

! You will find matching linkable collectors on page 74. To retrofit earlier collectors, you will find coupler bars on page 66.

EWPU 410AG18

## GRIP RING HR 2000

The **Hammerlit grip ring HR 2000** makes it possible to securely mount a wide variety of bag types, from the Wickelsack® to polyester material bags.

■ All Hammerlit collectors starting from the year 1970 can be retrofitted with the HR 2000.

1 Fold lip of the grip ring down.

2 Position the bag over the ring.

3 Fold the lip of the grip ring upwards ...

4 ... thereby securing the bag.

5 Folded in the grip ring, the bag is now securely in place.

6 To remove the bag, simply pull down at the edge of the bag. This will bring the lip of the grip ring downwards to release the bag.

## HAMMERLIT LIDS WITH POLYMER HINGES

+ Ergonomic handling

+ Lid secures

### POLYMER LID WITH INTEGRATED HINGE PART DT 8

#### // SPECIAL FEATURES

- + Ergonomic handling
- + High stability
- + Noise-reduced
- + Lid secures against breaking-off
- + Lid can be mounted and de-mounted without tools
- + Pedal mechanism can be retro-fitted
- + Lower hinge bracket mounted on vertical tube
- + Easy to clean, eliminating from parts where dirt can accumulate
- + Lower hinge bracket protects wall from possible damage. Bracket is attached to a welded part of the frame, to prevent from slipping out of position

LID WITH INTEGRATED HINGE DT 8  
Modern design available in 8 colors

LID HINGE PART L6  
Lower hinge bracket successfully tested in more than 1.000.000 cycles

### SEPARATE LID WITH INTEGRATED HOOK D 6

#### // SPECIAL FEATURES

- + Lid without integrated hinge part
- + Integrated hook of the lid, enables hanging on the grip ring, when open
- + Material: shock-proof, anti-static plastic (ABS)

## WIRE CONTAINER CARTS

This cart is a combination of transport cart and bulk container. Each cart has 2 folding shelves, which when folded down make the cart ideal for transporting soiled linen and laundry bags. When the shelves are folded up, fresh linen can be transported.

The **HC 173** impresses with its high **flexibility**. Nearly each conceivable shelf configuration is possible. As this wire container is easy to assemble, it can also be delivered in an economical knocked down version. (Please add **UM** to the model).

## BULK LINEN WASTE TRANSPORT CARTS, ALUMINUM ANODIZED

TBA 56 E

Bags filled with soiled laundry, especially those from operation rooms and Intensive Care Units, as well as waste bags, should only be transported in **closed containers**. Our models **TBA 56 E** and **TBA 66 E** made of anodized aluminum have been especially designed for this application.

These carts all have hinged lids which open lengthwise. Two handles are mounted at the cart to allow easy maneuvering. Models **TBA 56 SG** and **TBA 66 SG** have an additionally reinforced bottom frame and **wrap-around bumpers**, which ensure extra stability and a long life in the field. As optional equipment also available with joint and hitch. Order code **KD ALU**.

For models **TBA 56 E** and **TBA 56 SG**, the front wall consists of three sections, which can be folded down as shown in the pictures above. This reduces the height that material needs to be lifted into the cart to only 680 mm from the floor. This container has a loading capacity of 6 to 8 full 70 liter transport bags and a load rating of 180 kg. A drainage faucet and a push handle are also standard equipment.

„Both carts are available in-and-excluding protection bumpers!“

TBA 56 SG

TBA 66 E

TBA 66 SG

Container models **TBA 66 E** and **TBA 66 SG**, come standard with a bi-sectional, collapsible front wall. When this front wall is folded down, the loading height of the cart is reduced to 840 mm. A drainage faucet at the bottom of the cart and a push handle on the side where the swivel casters are located are also standard equipment. Carts have a loading capacity of 10 to 12 70 liter bags and a load rating of 180 kg.

## COMBICAR TRANSPORT CARTS, STAINLESS STEEL

Undercarriage frames and constructions are made of stainless steel. The solid shelves are made of wipe-clean material and can be disinfected.

Combicar transport carts come standard with three rubber straps (CBZ 20), with the exception of CB 270.

Three variations of the new Combicar are available:

- Full length boards with wire shelves
- Full length boards with solid shelves
- Split boards with solid shelves

The full length boards can be folded forward or back. Normally the Combicar comes standard with two shelves that can be folded to the rear.

2 shelves foldable to the rear

## LAUNDRY CIRCUIT WICKELSACK®

For more than 50 years, the laundry transport bag Wickelsack® has enabled the transport of soiled laundry directly from the point of use to the washing machine in the simplest and most hygienic way. The sack with the 1000-wash guarantee contributes as a sustainable long-term product to cost reduction and environmental protection. Fit the Wickelsack® over the unfolded retaining ring and fold together. Collecting and sorting soiled laundry and distributing fresh laundry, e.g., with the linkable trolley. Remove the Wickelsack® and close with the attached toggle. Processing of fresh laundry (ironing/pressing/folding). Automatic emptying of the Wickelsack® within approx. 90 seconds after previous opening of the toggle. Transport to the laundry/washing machine.

## MOBILE BAG CARRIER

Transporting **clean linen** from the laundry to the linen room must be carried out under the same hygienic standards as those that apply to the transport of soiled linen. The fresh linen should therefore be packed into a dustproof, germproof bag immediately after washing and/or sterilizing.
